

Copper Earth Plates & Copper Lattice

We offer a wide range of electrolytic grade, pure copper plate with 99.9% purity and high conductivity, which provide a long lasting earthing solution in places where driving earth rods might be impractical. They are often installed in conjunction with low resistance earthing compound.

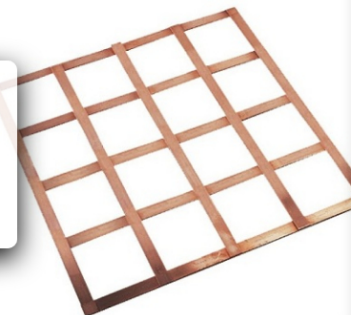

Solid Copper Earth Lattice mats with copper rivet offer a more economical cost option to install solid copper plates. This is a preferred option on installations such as telecommunication towers, where touch and step potential could cause problems.

Sizes

- Width - 200mm onwards
- Thickness - 2mm onwards

Applications

- Grounding
- Lighting & Protection

CITIZEN METALLOYS LTD

Citizen Metalloys is a leading manufacturer of copper Bus Bars, Rods, Sections and Components. The total Production capacity is 4000 tons with 100 number of employee. Being a leading exporter we are exporting to 40+ countries worldwide. Also awarded for Star performer in western region for five consecutive years.
