

Copper Washers and Copper Nails

Copper washer that are developed using best quality materials procured from our own material. Copper washers are mainly developed to meet the emerging demands of our customers. The washers are known for their effective performance, durability and resistant to corrosion.

Manufactured from pure-hard drawn copper, these square shank nails can be used as a rivet or for face nailing. Mostly used where the level of corrosion is high. It gives the product a best grip and a long lasting period.
